Connor,

Here is information on the Procino discharge permit. I am still working on getting the rest but I will be out so I wanted to get you as much as I could before I left.

John Cargill suggested that the EPA Criminal Investigation Division may have the records you are looking for since the Procino was investigated by EPA CID. John said that he dealt with James Lorah, who has retired. I am hoping that maybe this EPA Agency could get you the records that you need.

Good morning Rick:

The attached 1998 permit is the oldest one we could find in the County's record storage. Anything older than it will have to come from State Archives.

Regards, Hans

Greetings Rick:

I had noticed you were in the CC mix. Good working with you again.

You are correct that they had a pretreatment permit but the records are achieved. We will conduct a search to see if they are still in our hands or at State Archives. Once I have an answer we will let you know.

Regards, Hans

Hans,

I hope you are doing well. I remember working on the Houston Landfill and I have been cc'ed on the Angola Landfill emails that have been flying around recently.

I am working on the Blades Groundwater Site and EPA is requesting information on wastewater permits for Procino and Peninsula Plating going back to 1995. My understanding is that Sussex County Engineering Department would have handled the permits.

Who would be the best person to talk to in the Engineering Department about the records or is there an online database I can search? Thanks.
